

ENDURA PAINT

DURACOAT

HIGH PERFORMANCE ACID &
CHEMICAL RESISTANT COATING

The Endura Advantage™

Hydrochloric Acid Resistant

High Gloss

Exceptional UV Light Protection

DuraCoat

24 Hours

Spot test using 37% hydrochloric acid (highest concentration of Muriatic acid). After 24 hours Endura DuraCoat is not affected.

Endura DuraCoat is a modified polyurethane top coat designed to provide extra protection against Hydrochloric acid and Sulfuric acid. It is suitable for use in many harsh chemical environments, providing extra protection against acids and acid rain. UV light absorbers provide exceptional ultraviolet light protection and increase the service life of all colors.
