

Technical Bulletin #71

Issue Date: December 20, 2021

DISCONTINUATION of Multiplier for TB-45

(referenced in Technical Bulletin #68)

Endura has done a full update to all formulas, and this eliminates the need for the multiplier when producing colors with TB-45.

TB-45 cans (with the multiplier sticker) or future cans from Endura (that will no longer have a sticker, after B121620) **require NO multiplier.** If you have an older batch of TB-45 or are unsure whether the TB-45 you have in stock requires the multiplier, please contact our color dept with the batch number.
