

Technical Bulletin #72

Issue Date: April 2, 2024

D2m Excel – Product Change

We have had requests from the field to slow down the d2m Excel.

As a result, we are removing the SuperCat from the d2m Excel neutral formula. This allows for more flexibility to adjust the product to suit the production and environmental conditions.

For any customers or distributors that have stock of d2m Excel Neutral please note that the first batch WITHOUT SuperCat I will be **B132113**.

Customers who wish to keep the speed of the d2m can add SuperCat II to the product.
Please see the SuperCat II TDS for amounts and additional information on the proper use of SuperCat II.

Updated copies of the TDS documents are on the website (version 2.3)

For any questions, please call your Endura representative.
