## TB39 Pearl Powder

The manufacturer of our TB39 pearl powder has notified Endura of a change in their manufacturing process, which will have the effect of changing the colour of the pearl. We have obtained samples to test and found the colour difference unacceptable.

We are currently re-matching the formulas that we can track in our company software. As to all the other formulas in the computer software, we are marking them inactive/deleted. If you require any of these to be re-matched please let the colour lab here at Endura know by filling out a colour match request form (please specify: rematch to code or to what has been sold).

Any question can be directed to Endura Colour Lab at (780) 451-4242
