

## Technical Bulletin #49

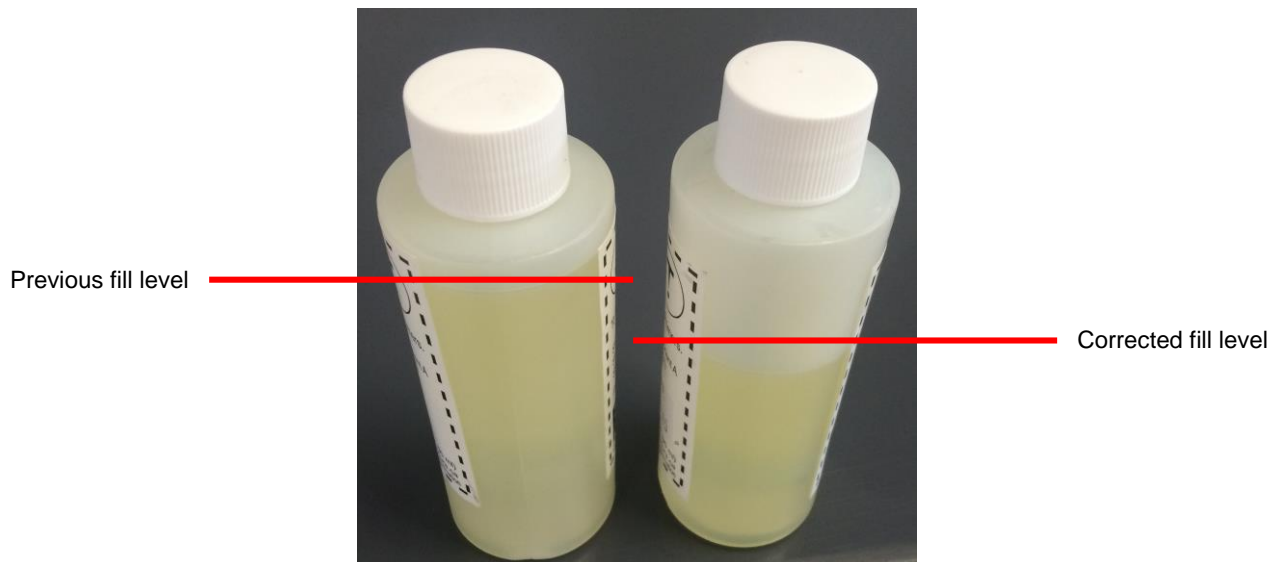

July 30<sup>th</sup>, 2015

### Fill level of EpoCat Bottles

Due to a filling error, bottles of EpoCat have been previously filled to 4 oz. The correct fill level for a bottle of EpoCat is 3 oz. /90ml, as the label suggests.

Moving forward the bottles will be filled to the 3 oz. mark. This will leave a 1 oz. space at the top of the bottles *(as we are currently using 4 oz. bottle...we are working to source a new 3 oz. bottle for the EpoCat)*.

For more information on EpoCat please see the [EpoCat TDS](#)

For any questions on the fill level please contact your Endura representative or the Endura main office @ 1-800-661-9930.
