## Technical Bulletin #62 June 14, 2018

### Endura EP-PA Low VOC Primer Product Update

As Strontium Chromate has been found to be a health concern, Endura has removed it as a corrosion inhibitor from EP-PA Low VOC Primer and replaced it with a non-toxic additive that performs the same function.

EP-PA Low VOC Primer (FEA0054 – Component A) and (FEB0054 – Component B) has been replaced by EP-PA Low VOC CF Primer (FEA0066 – Component A) and (FEB0066 – Component B).

For any customers or distributors that have stock of EP-PA Low VOC Primer (FEA0054 & FEB0054), please note that this product is still viable for use and sales until stocks have been depleted.

For any questions please call your Endura representative at 1-800-661-9930.
