HFE 3080 Primer – Make to order product

As the sales of the HFE 3080 primer do not warrant us to keep this product on the shelf, we are changing it to a make to order product.

HFE 3080 is still a viable product for superior corrosion resistance; therefore we will not eliminate the product.

Please keep in mind that the factory will need at least one week's notice to manufacture this primer for an order.

If this product is added to a spec, or a customer wants to use it on a consistent basis, we will change it back to a stocked product.

For any questions please call your Endura Representative at 1-800-661-9930.
