### Product Notice – MC-1C Discontinued

After a review of our current product offerings we determined that due to the lower demand and higher VOC content of the MC-1C Topcoat this product will be discontinued and is no longer available for sale.

**Please see below for alternatives:**

**Clear 100** - Endura EX-2C Clear 100 is a clear coating designed to give extra protection to solid, metallic, and pearl colors. It is suitable for use in many harsh chemical environments, providing extra protection against the effects of acid and acid rain. UV light absorbers provide exceptional ultraviolet light protection and increase the service life of all colors.

Product information for our Clear 100 is available on our website at:

Clear 100

Anyone with MC-1C in stock, please contact Steve Bragg at Endura for an RMA# for its return.

Thank you,

Elissa
